

Flights of Fancy

What can you see and do with young children... who love space?

Space Race, Gallery 114

- ★ See rockets, missiles, and the full-size model of the Hubble Space Telescope.
- ★ Find the space suits. Some of them have actually been to space!
- ★ Walk through Skylab Orbital Workshop, the first U.S. space station (enter from second floor).

Explore the Universe, Gallery 110

- ★ As you enter the gallery, pretend your hands are a telescope and look up for stars!
- ★ Look for telescopes of different sizes – even one that is 20 feet long!
- ★ See what you look like in infrared light – different colors mean different temperatures. You are so colorful!

Exploring the Planets, Gallery 207

- ★ Find models of the planets in our solar system.
- ★ See a full-size model of a Mars Exploration Rover. Two rovers just like this landed on Mars in 2004 to help scientists learn more about the rocks and soil. Watch a video showing how the rovers got to Mars.
